SEO Content Optimization

PROJECT OVERVIEW

01.

I worked on optimizing website content using SEO principles to improve content structure, keyword relevance, readability, and search visibility. The project focused on creating content that is valuable for users while following essential on-page SEO practices.

SKILLS DEMONSTRATED

- Content Analysis
- Keyword Research
- On Page Optimization
- Off Page Optimization
- Advanced SEO
- Verification using GSC

CONTENT ANALYSIS

Planned and structured the website content based on the target audience, SEO goals, and business objectives. Analyzed competitor websites to identify content gaps, relevant topics, keyword opportunities, heading structures, and ways to create more valuable and search-friendly content.

KEYWORD RESEARCH

Researched relevant primary and secondary keywords using Google Keyword Planner, considering search intent, target audience, keyword relevance, search volume, competition, and content opportunities. Selected keywords strategically to support the website's content structure and SEO goals.

ON PAGE OPTIMIZATION

Worked on key on-page SEO elements, including:

- SEO Title
- Meta Description
- H1 and H2 Headings
- Readability
- Keyword Placement
- Content Structure
- Search Intent Alignment

ADVANCED SEO

Implemented advanced SEO techniques including schema markup, entity optimization, content clustering, and technical SEO improvements.

VERIFICATION USING GSC

Used Google Search Console to monitor performance, track keyword rankings, fix issues, and ensure search visibility improvements.
